**CURRICULUM VITAE**

**JAMES H. ALBERT**
**January 2020**

## Address

Department of Mathematics and Statistics, Bowling Green State University, Bowling Green, OH 43403

## Contact Information

Office:  419-372-7456
Home:  419-422-6564
email:  albert@bgnet.bgsu.edu
website:  http://www-math.bgsu.edu/~albert

## Academic Degrees

Ph.D., Statistics, Purdue University, August 1979
M.S., Mathematical Statistics, Purdue University, December 1977
B.S., Mathematics, Bucknell University, June 1975

## Academic Positions

1994-1995      Visiting Professor, Institute of Statistics and Decision Sciences, Duke University
1990-present   Professor of Mathematics and Statistics, Bowling Green State University
1985-1990      Associate Professor of Mathematics and Statistics, Bowling Green State University
1986-1987      Visiting Fellow, Faculty of Mathematical Studies, University of Southampton
1979-1985      Assistant Professor of Mathematics and Statistics, Bowling Green State University
1975-1979      Teaching Assistant, Purdue University

## Honors and Awards

Distinguished University Professor, Bowling Green State University, February 2018

Founders Award from the American Statistical Association, August 2015

Fellow of the American Statistical Association, August 2000

Significant Contributor to Statistics in Sports 2004, an award given by the Section of Statistics in Sports of the American Statistical Association

The Sporting News-SABR Baseball Research Award in 2001 for Curve Ball: Baseball, Statistics and the Role of Chance in the Game

## Research Interests

Bayesian Analysis, Statistical Decision Theory, Statistical Computing and Graphics, Contingency Tables, Mathematical Statistics, Exploratory Data Analysis, Teaching of Statistics, Analysis of Sports Data.

**Computer Experience**

I have programmed extensively using the languages FORTRAN, PASCAL, BASIC, C, APL, and MATLAB.  In addition, I am familiar with the statistical packages  S, SAS, SPSS-X, BMDP, GAUSS, GLIM, MINITAB, and R.

**Statistical software written:**

1.  JSTAT - a Macintosh statistics package for an elementary statistics class.  This package emphasis basic exploratory data analysis techniques, probability simulation, sampling distributions and basic statistical inference.

2.  bayes35 - a Bayesian computing package for the Macintosh.  This program implements an adaptive quadrature approach for the summarization of 1, 2 and 3 parameter posterior distributions.  It can compute various posterior moments and plots one and two dimensional marginal posterior distributions.

3. Bayes/Minitab - a collection of Minitab macros designed for teaching Bayesian concepts at an elementary level.  The macros perform basic inference for means and proportions using discrete and continuous models.  In addition, the macros can be used to summarize arbitrary one or two parameter posterior distributions.

4. Ordinal Regression Toolbox (with Val Johnson) - a collection of MATLAB functions for fitting and checking a variety of binomial and ordinal regression models

5. LearnBayes – a R package to implement Bayesian calculations.

6. LearnEDA – a R package to accompany MATH 4470/5470 Exploratory Data Analysis

7.  BayesTestStreak – a R package to accompany "Looking at Spacings to Access Streakiness", published in *Journal of Quantitative Analysis of Sports*, 2013.

8.  TeachBayes – a R package to assist in the teaching of the "Beginning Bayes" course for datacamp.com.

9.  BApredict – a R package to accompany Improved Component Predictions of Batting and Pitching Measures, *Journal of Quantitative Analysis of Sports,* 2016.

10.  ProbBayes - a R package to accompany the text *Probability and Bayesian Modeling*

**Research or Professional Consultantships**

Summer 1980 - Summer 1983   Assistant Director, Statistical Consulting Center, Bowling Green State University

Spring 1983   Interim Director, Statistical Consulting Center, Bowling Green State University

1977-1978  Statistical Consultant, Purdue University

**Research Projects or Grants**

ONLS in Mathematics - Building a PK-5 Foundation for Success, Ohio Department of Education, July 2015 – August 2017.

EXTREEMS-QED: Computational Mathematics and Statistics Program, supported by the National Science Foundation, September 2013 – June 2018.

Beyond Introductory Statistics:  Generalized Linear and Multilevel Models (with Brad Hartlaub), a PREP workshop supported by the Mathematical Association of America, Summer 2012.

Teaching Statistics Using Active Learning and Technology (with Brad Hartlaub), a PREP workshop supported by the Mathematical Association of America, Summer 2011.

Teaching Statistical Thinking Through Sports, a PREP workshop supported by the Mathematical Association of America, Summer 2010.

Developing Reasoning about Data and Chance, supported by the Ohio Department of Education, July 2007-June 2009.

One of the participants in a grant awarded to BGSU and University of Toledo in 2003 to develop a set of on-line courses in mathematics and statistics for inservice teachers

Sports Modules for Teaching Introductory Statistics, supported by National Science Foundation, June 2000-June 2002.

A Probability/Activity Approach for Teaching Introductory Statistics, supported by National Science Foundation, June 1998-June 2000.

Funded participant at the AMS Summer Research Conference on Markov Chain Monte Carlo Methods, June 1994.

Funded participant at the International Workshop on Hierarchical Modeling, Rio de Janeiro, Brazil, December 1993.

Funded participant at the 4th Valencia International Meeting on Bayesian Statistics, April 1991. Travel was partially supported by National Science Foundation and local expenses were supported by the Province of Valencia.

Funded participant at the AMS summer research conference on Statistical Multiple Integration, June 1989.

NSF/CBMS Conference in Mathematical Sciences on Hierarchical and Empirical Bayesian Models and Methods, funded by the National Science Foundation, March 1986-February 1987.

Funded participant at the NSF-CBMS regional conference on Multivariate Estimation, January 1985.

Funded participant at the NSF-CBMS regional conference on Nonparametric Priors, June 1985.

Faculty Research Associateships, Bowling Green State University, Summers 1980, 1981, 1984, 1986, 1990.

Faculty Research Committee travel grant to the Second International Meeting on Bayesian Statistics, September 1983.

Faculty Development Committee Speed Grant: "Computer Science and Statistics: 14th Annual Symposium on the Interface", June, 1983.

Faculty Development Committee Speed Grant: "Conference on Teaching of Statistics and Statistical Consulting", September 1982.

Research Assistant, National Science Foundation, Purdue University; 1978-1979.

David Ross Fellowship, Purdue University, 1978-1979

**Administrative Experience**

1986    NSF/CBMS Conference in Mathematical Sciences on Hierarchical and Empirical Bayesian Models and Methods.  As the conference director, I arranged the program, speakers and coordinated all of the housing, transportation and social events.

1987    The 4th Ohio Statistics Conference.  Arranged the program and speakers for this one day program, designed to encourage undergraduate students to study statistics.

1989-91 Graduate Coordinator, Department of Mathematics and Statistics, Bowling Green State University. Supervision of a masters and Ph.D. program of 50 students.

1992    The Second Eugene Lukacs Conference on Order Restricted Inference.  I helped in the coordination of the program for the 3-day meeting and coordinated all of the housing, transportation and social events.

1997    The Seventh Eugene Lukacs Conference.  I helped in the coordination of the program for the 3-day meeting and coordinated all of the housing, transportation and social events.

1997    The 14th Ohio Statistics Conference.  Arranged the program and speakers for this one day program, designed to encourage undergraduate students to study statistics.

2000-02 Undergraduate Coordinator, Department of Mathematics and Statistics, Bowling Green State University.

2006    Beyond the AP Statistics Workshop.  I organized this meeting for high school teachers in the Northwest Ohio area who were interested in the AP Statistics program.

2010-11 Undergraduate Coordinator, Department of Mathematics and Statistics, Bowling Green State University.

2011-13 Foundational Mathematics Coordinator, Department of Mathematics and Statistics, Bowling Green State University.

2014-2018 Undergraduate Coordinator, Department of Mathematics and Statistics, Bowling Green State University

**Editorial/Refereeing Activity**

1.  Editor of Chance Magazine, 2015-

2.  Associate Editor of Journal of Quantitative Analysis of Sports, 2015-

3.  Executive Editor of Journal of Quantitative Analysis of Sports, 2011-2014

4.  News Editor of Significance Magazine, 2010-2011.

5.  Associate Editor of Journal of Statistics Education, 2009-

6.  Associate Editor of JASA/TAS Reviews, 2007-2011.

7.  Executive Editor of The American Statistician, 2003-2005.

8.  Associate Editor of the Journal of the American Statistical Association, 1996-2002.

9.  Associate Editor of Communications of Statistics, 1993-1998.

10.  Have served as a reviewer for the Annals of Statistics, the Journal of the American Statistical Society, the American Statistician,  Applied Statistics, Biometrika, Communciations in Statistics, Statistics and Probability Letters, the Journal of Educational Statistics, Biometrics, Canadian Journal of Statistics, Statistics and Decisions, Journal of Statistical Education, and Psychometrika.   Also, I have reviewed proposals sent to the Probability and Statistics section of the National Science Foundation, and have served on Screening Panels for the Statistics section of NSF.

**Publications**

**Citation Counts**

On August 26, 2019, my publications have received a total of 8003 citations and 2522 since 2014. The one paper "Bayesian analysis of binary and polychotomous response data" has received 3190 citations (this paper was listed number 13 in the list of most cited statistics papers since 1993 in Ryan and Woodall (2005)  Journal of Applied Statistics).

**Books**

1996    Bayesian Computation Using Minitab, Duxbury Press.

1999    Ordinal Data Modeling (with Val Johnson), Springer-Verlag.

2001    Workshop Statistics, Discovery with Data, A Bayesian Approach  (with Allan J Rossman), Key College Press

2001    Curve Ball : Baseball, Statistics, and the Role of Chance in the Game (with Jay Bennett), Copernicus Books.  (Revised paperback version published in 2003.)  (Japanese translation published in 2004.)

2003    Teaching Statistics Using Baseball, Mathematical Association of America
(Revision published in January 2017.)

2005    Anthology of Statistics in Sports, SIAM, (edited volume with Jay Bennett and James Cochran)

2007    Bayesian Inference Using R, Springer.  (Revision published in 2009.) (Japanese translation published in 2010.)

2007    Statistical Thinking in Sports, CRC (edited volume with Ruud Koning)

2011    Data Analysis and Probability for Teachers

2011    R by Example (with Maria Rizzo), Springer

2013    Analysis of Baseball Data Using R (with Max Marchi), CRC (Revision with Ben Baumer be published January 2019)

2017    Anthology of Statistics in Sports II, Oxford University Press (edited volume with Jay Bennett and James Cochran)

2017    Handbook of Statistics in Sports, CRC, edited volume with Mark Glickman, Ruud Koning, and Tim Swartz

2017    Visualizing Baseball, CRC in the ASA-CRC Series on Statistical Reasoning in Science and Society

2019    Probability and Bayesian Modeling (with Monika Hu), CRC, published December 2019.

**Articles**

1. 1981  Simultaneous estimation of Poisson means.  Journal of Multivariate Analysis , 11, 400-417.

2. 1981  Pseudo-Bayes estimation of multinomial proportions.  Communications in Statistics, A, 10, 1587-1611.

3. 1981  Bayesian estimation in 2x2 contingency tables (with A. K. Gupta). Proceedings of the Social Statistics Section of the American Statistical Association, 1980, 461 466.

4. 1982  Mixtures of Dirichlet distributions and estimation in contingency tables (with A. K. Gupta).  Annals of Statistics, 10, 1261-1268.

5. 1983  Estimation in contingency tables using prior information (with A. K. Gupta).  Journal of the Royal Statistical Society, Series B , 45, 60-69.

6. 1983  A pseudo-Bayes confidence region for p Poisson means.  Journal of Statistical Computation and Simulation, 17, 11-29.

7. 1983  Models for reflecting prior beliefs of association in contingency tables (with A. K. Gupta).  Communications in Statistics, A, 12, 1241-1260.

8. 1983  Bayesian estimation methods for 2x2 contingency tables using mixtures of Dirichlet distributions (with A. K. Gupta).  Journal of the American Statistical Association, 78, 708-717.

9. 1984  Empirical Bayes estimation of a set of binomial probabilities. Journal of Statistical Computation and Simulation, 20, 129-144.

10. 1985  Bayesian methods for binomial data with applications to a nonresponse problem (with A. K. Gupta).  Journal of the American Statistical Association, 80, 167-173.

11. 1985  A Bayesian treatment of nonresponse when sampling from a dichotomous population. Communications in Statistics, A, 14,947-961.

12. 1985  Bayesian estimation methods for incomplete two-way contingency tables using prior beliefs of association.  In Bayesian Statistics 2  (Proceedings of the Second Valencia International Meeting on Bayesian Statistics) , 589-602.

13. 1985  Simultaneous estimation of Poisson means under exchangeable and independence models.  Journal of Statistical Computation and Simulation, 23, 1-14.

14. 1987  Empirical Bayes estimation in contingency tables.  Communications in Statistics,  A, 16, 2459-2485.

15. 1987  Bayesian estimation of odds ratios under independence and exchangeable models. Journal of Statistical Computation and Simulation  27, 251-268.

16. 1988  Estimation of a Poisson mean using discrete mixtures of conjugate priors. Communications in Statistics,  A,   17, 245-261.

17. 1988  Computational methods using a Bayesian hierarchical generalized linear model.

Journal of the American Statistical Association  83,  1037-1045.

18.  1988  Bayesian estimation methods for Poisson means using a hierarchical log-linear model.
     Bayesian Statistics 3  (Proceedings of the Third Valencia International Meeting on
Bayesian Statistics), 519-531.

19.  1989  Nuisance parameters and the use of exploratory graphical methods in a Bayesian
analysis. The American Statistician., 43, 191-196.

20.  1989  A Bayesian approach to some overdispersion models (with P.A. Pepple). Canadian
Journal of Statistics  17, 333-344.

21.  1990  A Bayesian Test for a Two-Way Contingency Table Using Independence Priors.
Canadian Journal of Statistics  18, 347-363.

22.  1991  Discussion on papers by Geweke, Wolpert, Evans, Oh and Kass, et. al. Contemporary
Mathematics , Vol. 115.

23.  1991  A class of distributions for robustness studies (with M. Delampady and W. Polasek).
Journal of Statistical Planning and Inference  28, 291-304.

24.  1992  Algorithms for Bayesian computing and Mathematica.  Proceedings of the 22nd Annual
Symposium on the Interface of Computer Science and Statistics.

25.  1992  Invited discussion of "Parametrization issues in Bayesian inference" by Hills and
Smith.  Bayesian Statistics 4  (Proceedings of the Third Valencia International Meeting on
Bayesian Statistics) .

26.  1992  Using a probability plot to summarize a unimodal posterior density. Computational
Statistics and Data Analysis, 14, 193-205.

27.  1992  A Bayesian analysis of a Poisson random effects model for homerun hitters. The
American Statistician  46, 246-253.

28.  1992  Bayesian estimation of normal ogive response curves using Gibbs sampling.  Journal
of Educational Statistics 17, 251-269.

29.  1992  Bayesian estimation of the polychoric correlation coefficient.  Journal of Computational
Statistics and Simulation, 44, 47-61.

30.  1993  Bayesian inference of autoregressive time series with mean and variance subject to
Markov jumps (with S. Chib).  Journal of Business and Economic Statistics, 11, 1-15.

31.  1993  Bayesian regression analysis of binary and polychotomous response data (with S.
Chib).  Journal of the American Statistical Association, 88, 657-667.

32.  1993  Teaching Bayesian statistics using sampling methods and MINITAB.  The American
Statistician , 47, 182-191.

33.  1993  Discussion of "A Statistical Analysis of Hitting Streaks in Baseball" by S. Christian
Albright.  Journal of the American Statistical Association , 88, 1184-1188.

34.  1993  Answering questions about baseball using statistics (with Bill James and Hal Stern).
Chance, 6, 17-22.

35.  1994  A Bayesian approach to estimation of GPA's of University of Iowa freshmen under
order restrictions.  Journal of Educational Statistics , 19, 1-22.

36.  1994  Selecting the normal population with the best regression value - a Bayesian approach (with D. Fong and M. Chow).  Journal of Statistical Planning and Inference, 40, 97-111.

37.  1994  Exploring baseball hitting data:  what about those breakdown statistics.  Journal of the American Statistical Association, 89, 1066-1074.

38.  1995  Bayesian residual analysis for binary response regression models (with Sid Chib). Biometrika, 82, 747-759.

39.  1995  Teaching inference about proportions using Bayes and discrete models.  Journal of Statistical Education, v. 3, n. 3.

2011    Two streaky performances in Ohio.  Published February 14, 2011.

**Reviews**

1993    Review of The Analysis of Contingency Tables (second edition) by B. S. Everitt, Technometrics, 35, 327-328.

1994    Review of the resampling method of teaching statistics (with Mark Berliner), The American Statistician, 48, 129-131.

2000    Review of Bayesian Methods:  An Analysis for Statisticians and Interdisciplinary Researchers, by T. Leonard and J. Hsu, Journal of the American Statistical Association

2001    Review of Applied Stochastic Modeling, Journal of the American Statistical Association

2002    Review of Calculated Bets, The American Statistician, November 2002.

2006    Review of Baseball All-Time Best Hitters, Mathematical Intelligencer, Winter 2006, Vol 28, p. 63-66.

2008    Review of Statistics for Real-Life Sample Surveys:  Non-Simple-Random Samples and Weighted Data, Siam Review.

2008    Review of Contemporary Bayesian and Frequentist Statistical Research Methods for Natural Resource Scientists, Journal of the American Statistical Association,  December 2008, Vol 103, No. 484, 1708-1709..

2008    Review of Elementary Bayesian Biostatistics, Journal of the American Statistical Association, December, 2008, Vol 103, No. 484, 1712-1713.

2009    Review of Data Manipulation with R, The American Statistician, May 2009.

2009    Review of Bayesian Reliability, Journal of the American Statistical Association, June 2009.

2009    Review of Bayesian Methods for Data Analysis, Third Edition, Journal of the American Statistical Association, June 2009.

2009    Review of Introduction to Probability with R, The American Statistician, May 2009.

2009    Review of The Theory and Practice of Item Response Theory, Journal of the American Statistical Association, December 2009, Vol. 104, No. 488, 1755.

2010    Review of A First Course in Bayesian Statistical Methods, Journal of the American Statistical Association, June 2010.

2011    Review of Bayesian Analysis for the Social Sciences, The American Statistician, February 2011, Vol. 65, No. 1, 62-63.

2011    Review of Bayesian Item Response Modeling:  Theory and Applications, Journal of the American Statistical Association, September 2011, Vol. 106, No. 495, 1220.

2011    Review of The Pleasures of Statistics:  The Autobiography of Frederick Mosteller, Journal of the American Statistical Association, March 2011, Vol. 196, 378-379.

2011    Review of Moneyball:  Brad Pitt, the statistician and the movie (with Ray Stefani),

Significance, Vol.8, No. 4.

2012    Review of Bayesian Decision Analysis:  Principles and Practice, Journal of the American Statistical Association,  March, 2012

2015    Review of Graphical Data Analysis, Significance, March 2015.

2015    Review of Analytic Methods in Sports, Significance, December 2015.

**Technical Reports**

1979    Robust Bayes estimation.  Mimeograph Series No. 79-9, Department of Statistics, Purdue University.

1981    Bayes estimation of multivariate hypergeometric proportions with applications to contingency tables (with A. K. Gupta).  Technical Report No. 81-09, Department of Mathematics and Statistics, Bowling Green State University.

1983    A gamma-minimax approach for estimating a binomial probability.  Technical Report, Department of Mathematics and Statistics, Bowling Green State University.

1984    Estimation of a normal mean using mixtures of normal priors.  Technical Report, Department of Mathematics and Statistics, Bowling Green State University.

1989    On the use of power transformations to simplify posterior distributions.  Technical Report, Department of Mathematics and Statistics, Bowling Green State University.

1991    Exploring baseball statistics:  measuring batting performance.   Technical Report, Department of Mathematics and Statistics, Bowling Green State University.

1992    Applying a Markov switching model to baseball hitting data.  Technical Report, Department of Mathematics and Statistics, Bowling Green State University.

1992    Teaching statistical inference using Bayes. Technical Report, Department of Mathematics and Statistics, Bowling Green State University.

1993    Bayesian model checking for binary and categorical response data (with Sid Chib). Technical Report, Department of Mathematics and Statistics, Bowling Green State University.

1993    A practical Bayes approach for longitudinal probit regression models with random effects  (with Sid Chib).  Technical Report, Department of Mathematics and Statistics,      Bowling Green State University.

1997    Bayesian methods for cumulative, sequential, and two-step ordinal data regression models  (with Sid Chib). Technical Report, Department of Mathematics and Statistics,

Bowling Green State University.

2002    Using play-by-play baseball data to develop a better measure of batting performance. Technical Report, Department of Mathematics and Statistics, Bowling Green State University
